

A Powerful Phonics Intervention for All

Not all literacy and education solutions are equal.

As a teacher or education leader, you want literacy interventions that target your need to be swift, successful and provide measurable results.

Let's see if Lexonik Leap is right for you...

- Do you have students who find literacy particularly challenging and need an age-appropriate intervention?
- Are your learners facing significant phonics gaps?
- Do you have a number of students for whom English is not their first language?
- Do you have students with an SAS score of below 85?
- Do you want to be able to track progress in phonics with older learners?

If you've said yes to some of these questions, then Lexonik Leap is absolutely the right intervention for your school to consider.

It effectively – and demonstrably – resolves phonics gaps for learners who find literacy particularly challenging, at any age, and those for whom English is not their first language.

Diagnosis to Delivery

Individuality for Effective Results

Lexonik Leap is based on an initial online and a trackable diagnostic assessment via Lexonik's educator platform. Lexonik Leap is adapted to allow for an individualised learning pathway, meaning the duration of the programme is dictated by the student's level of need.

The programme can be delivered 1:2, but ideally as a small group intervention. It is ideal for students with an SAS score of 85 and below, regardless of age.

There is no cap on the number of students who can go through Lexonik Leap.

Assessment and Progression

The paperless Leap diagnostic assessment, accessible via Lexonik Cloud's Assessment App, identifies learners' phonics gaps and determines the entry point on to the Leap programme.

Lexonik's educator platform allows schools to organise and analyse progress data, tracking progress and reporting to stakeholders with ease.

We absolutely understand the need for you to evidence through data.

Lexonik allows you to achieve that, with ease.

Lexonik Assessment

Breakdown of Programme Themes

Phoneme to grapheme correspondence word building

High frequency words

Vowel diagraphs

Split diagraphs prefix knowledge

But Why and How Does it Work?

Great question.

Lexonik Leap Demo

We've put a great deal of time into engineering and formatting this programme in a way that ensures it is perfectly curated for the audience of pupils who need it most. In particular, we feel it is:

- Engaging and fun for learners
- Secures phonological awareness
- Develops automaticity
- Consolidates prior learning
- Incorporates spaced and phased repetition plus retrieval practices

What you can expect from us:

Lexonik are passionate about providing the right product, and onward customer service. Here's what you can expect by signing up to Leap:

- Full day in-house, or remote, teacher training workshop
- Training provided either for individual schools, or a larger scale Trust-wide event (on application)
- Diagnostic assessment, delivery and teaching materials
- Access to Lexonik's educator platform for further online teaching support
- Ongoing delivery and account management support
